The applications for fiber are extensive

A few years ago, the use of fiber optic cabling in professional AV applications was limited to such special cases as HD broadcast cameras. Since then, the AV industry's adoption of fiber optics has increased immensely. Today, fiber optics are widely used for digital signal transmission in pro audio, professional broadcast, and the touring / rental industries. As pro audio and broadcast equipment has evolved from analog to digital data transmission, the industry has attempted to adapt connectors originally designed for data communication (e.g. RJ45 connectors for electrical transmission). Today, that trend continues with fiber optic connectors. However, conventional data communication fiber optic connectors (ST, SC, LC, etc.) have a risk of failure when they are deployed in AV applications. These conventional data connectors are optimized for permanent, one-time connection. They were never designed for mobile applications or to handle high mating cycles in harsh environments. Alternative connectors, originally developed for military applications, have not been cost effective and have been deficient either in regards to dust protection and

maintenance and/or in their attenuation and return loss characteristics.

Neutrik understood these deficiencies and solved the various issues associated with mobile fiber optic connectivity when it launched its opticalCON® fiber optic line in 2005. The opticalCON® design is based on a unique concept which combines low maintenance, high mating cycles, and a safe connection in the field. As a result, opticalCON® has gained wide acceptance in the pro audio and professional broadcast industries. Both well known equipment manufacturers and key industry users have put their trust in opticalCON® for many years.

opticalCON®

opticalCON® Design Criteria

The need for rugged fiber optic connections continues to grow rapidly, driven by such technologies as ultra high definition (UHD) 4K or 8K television signals running at data rates of up to 24 Gb/s. To accommodate these higher bandwidth signals, the Society of Motion Picture & Television Engineers (SMPTE) has standardized opticalCON® connectors as the rugged fiber optic interface for mobile high definition television broadcasting where robust and reliable solutions are required.

Neutrik's opticalCON® system became the fiber optic standard in various markets.

SMPTE standard ST2091-1

opticalCON® ADVANCED DUO is an LC-based fiber optic connection system which is typically used for equipment connections. With built-in, automatic dust shutters and a rugged housing, the fibers are always dust protected, and high mating cycles in harsh environments are achieved. Compatibility with conventional LC connectors at both the front and the rear of the chassis connectors offers users the choice of using either cost-effective, standard LC patch cables or else ruggedized opticalCON cables.

Following on the success of opticalCON ADVANCED DUO, the **opticalCON® ADVANCED QUAD** series, also an LC-based connector system, doubles the fiber count to offer a rugged point-to-point connection. opticalCON® QUAD has been successfully deployed in applications such as data routing for touring / live rental, including especially OB (outdoor broadcast) applications.

opticalCON® ADVANCED MTP® increases the number of fibers in one connector up to 24 and is the ideal solution for point-to-point multi-fiber signal transmission.

As an alternative to opticalCON MTP's single 12 or 24-fiber connector, Neutrik offers a wide variety of SPLIT cable configuration. opticalCON® SPLIT offers an alternative for users of opticalCON® DUO or QUAD chassis connectors, providing advantages in regards to field assembly and potential repair cost.

Finally, Neutrik's **opticalCON® LITE** connectors offer a cost effective and lightweight solution. The unique design of opticalCON® LITE's tactical patch cable allows extreme bending without fiber breakage and absorbs high lateral forces. As a result, the opticalCON® LITE is an ideal choice for such permanent and semi-permanent installations as server rooms, patch fields, and indoor cabling.

Mobile Field Cable Range

ADVANCED Cable

opticalCON DUO

Rugged and lightweight 2-channel mobile field cable, excellent cable retention due to aramid yarn, black PUR outer jacket, available in multi- and single mode (PC or APC), military approved.

opticalCON DUO X-TREME

2-channel X-TREME cable offering a cut-proof and rodent resistant double jacket glass yarn armoured cable construction, excellent cable retention due to aramid yarn, black PUR outer jacket.

opticalCON DUO ARMORED

Extra rugged and lightweight stainless steel, jacket absorbs lateral forces up to 200 kg/cm². Ultra flexible due to the special spring shape construction, available in multi- and single mode (PC or APC).

opticalCON DUO HYBRID

Extra rugged hybrid cable with 2 multimode channels and 4 x 0.75 mm² copper conductors, GFK strength member and aramid yarn as cable retention.

opticalCON DUO SMPTE

SMPTE cable with 2 single mode channels (PC or APC), 2 x AWG 24 and 4 x AWG 20 stranded copper conductors, overall copperbraided shield and stainless steel strength member, 120 kg/km.

opticalCON DUO LOW VOLTAGE HYBRID

Ultra flexible, cost effective and lightweight (65 kg/km) low voltage hybrid cable with 2 single mode channels and 2 x AWG 16 copper conductors, aramid yarn cable retention.

2M / 2S (A)

opticalCON QUAD

Rugged and lightweight 4-channel mobile field cable, excellent cable retention due to aramid yarn, black PUR outer jacket, available in multi- and single mode (PC or APC).

opticalCON QUAD X-TREME

4-channel X-TREME cable offering a cut-proof and rodent resistant double jacket glass yarn armoured cable construction, excellent cable retention due to aramid yarn, black PUR outer jacket.

opticalCON QUAD ARMORED

Extra rugged and lightweight stainless steel jacket absorbs lateral forces of 200 kg/cm². Ultra flexible due to the special spring shape construction, available in multi- and single mode (PC or APC).

4M / 4S (A)

X4M / X4S (A)

XX4M / XX4S (A)

opticalCON MTP® 12 & SPLIT

Rugged and lightweight 12-channel mobile field cable, excellent cable retention due to aramid yarn, black PUR outer jacket, available in multimode PC and singlemode APC.

opticalCON MTP® 24 & SPLIT

24-channel mobile field cable with excellent cable PUR outer jacket, available in multimode PC and singlemode APC.

opticalCON MTP® X-TREME & SPLIT

12-channel X-TREME cable offering a cut-proof and rodent resistant double jacket glass yarn armoured cable construction, excellent cable retention due to aramid yarn, black PUR outer jacket.

opticalCON POWER-SPLIT

Extra rugged hybrid cable up to 8 single mode channels and 2 x 1.5 mm² copper conductors, 1.5 mm² shield, 2 opticalCON cable connectors and 1 powerCON cable connector.

12M / 12S (A)

NEW

LITE Cable

opticalCON DUO LITE

Rugged and lightweight 2-channel patch cable, excellent cable retention due to aramid yarn, black PVC outer jacket, available in multi- and singlemode (PC or APC), suitable for permanent and temporary installation.

2M-L / 2S (A)-L

opticalCON QUAD LITE

Lightweight tactical patch cable, 4 x 900/125 micron fibers, rugged cable retention due to aramid yarn, black PVC outer jacket, available in multi- and singlemode (PC or APC), designed for permanent or semi-permanent installations.

4M-L / 4S (A)-L

opticalCON MTP® 12 LITE

Rugged tactical patch cable, 12x 250/125 micron fibers, aramid yarn for appropriate cable retention, black PVC outer jacket, available in multimode PC and singlemode (APC), suitable for permanent or semi-permanent installations.

12M-L / 12SA-L

opticalCON MTP® 24 LITE

Rugged tactical patch cable, 24 x 250/125 micron fibers, aramid yarn for appropriate cable retention, black PVC outer jacket, available in multimode PC and singlemode (APC), suitable for permanent or semi-permanent installations.

Cable Connector Assembly

NKO25-A*

NKO25-S5-A*

- Ruggedized and dirt-protected 2-channel fiber optic connection system
- Cable connector features rugged metal housing and heavy-duty cable retention
- Automatic sealing shutter with silicone gasket to protect the LC's
- Dust and water resistant according to IP65 in mated condition
- Accommodates standard optical LC-Duplex connectors
- Field repairable
- Easy to clean, no special tools required
- Reliable Push-Pull locking mechanism
- Cable connector comes pre-assembled with a choice of mobile field cables
- Range of 3 hybrid cables for powered applications:
 - SMPTE cable for indoor UHD camera routing applications¹
 - Hybrid multimode cable
 - Light weight low voltage camera / SM hybrid cable for ENG / SNG applications

¹... Not compatible to SMPTE 304M standard. Suitable for indoor (studio) camera links considering specific conditions acc. to IEC 60664-1 like pollution degree 1, overvoltage category 1 and rated voltage. For detailed information ask for the White Paper "opticalCON @ SMPTE Indoor Applications".

opticalCON® Split Cables

SPLIT & POWER SPLIT Cables

opticalCON®

SPLIT

NKOY*

- opticalCON multichannel solution based on opticalCON DUO, QUAD or MTP® connectors
- Maximum flexibility, combining up to 12-channel
- Custom configurations available
- 1m SPLIT fanout
- Color coding for channel identification
- Field assembly possible
- XTREME version available

opticalCON®

POWER-SPLIT

NKOYP*

- 2-, 4-, 6- and 8-channel assembly available
- Custom made cable, optimized for ENG / SNG applications
- Hybrid fiber / copper solution
- Custom Configurations
- Up to 240 V ac (16 A) power transportation possible

Ordering Information

Breakout Adapter

MTP® Breakout / Master Cable

- Low loss breakout cable
- Grade A premium ferrules
- LC (APC) / SC, ST breakout connector available
- Standard split length: 61 cm
- High performance USCONEC Elite® Male MTP® ferrule
- Interferometer measurement to guarantee high ferrule performance

High performance MTP® breakout cable for permanent and temporary installations. Standard premium grade A LCs (single-mode PC; multimode PC) guarantee low insertion loss values. 61 cm long fan-out for easy fiber breakout to any opticalCON DUO or QUAD chassis.

NKOB12SA-0-**	MTP® / LC - patch cable, Singlemode PC
NKOB12M-A-0-**	MTP® / LC - patch cable, Multimode PC

Attribute:

BO []	... breakout connectors (ST, SC), APC on request
*	... Fiber optic transmission parameters exceeding standard quality, suitable for measurement applications.
Notice:	Standard for out configuration comes with LC (PC) connectors.

Accessories

Accessories for Cable Connector

SCNO*X-A

SCNO*X-A-NC

NAO4ML-A

NOR-*

SCNO*X-A	Rubber coated protection cover for opticalCON cable connectors, including black chrome front housing
SCNO*X-A-NC	Light weight noise cancelling rubber protection cover for opticalCON cable connectors, including front housing
SCNO*X-R ¹⁾	Rubber coated protection cover for opticalCON cable connectors, ruthenium plated front housing, upgrade kit old connector
NOR-*	Color coding ring for cable connector chassis
NAO4ML-A	opticalCON QUAD LOOP connector, multimode
NAO4SL-A	opticalCON QUAD LOOP connector, singlemode

opticalCON Pulling Solutions

Single pulling sock
FOPS-SINGLE

Split pulling sock
FOPS-SPLIT

Application example: FOPS-SPLIT

- Pulling sock simplifies installation
- Pulling force > 100 kg
- Protects connectors in mated / unmated condition

FOPS-SPLIT	Split cable pulling sock
FOPS-SINGLE	Single cable pulling sock for DUO / QUAD or MTP® cables.

opticalCON® DUO LITE Cable Connector Assembly

NKO2M-L*

- 2-channel fiber optic connection system
- Cost optimized fiber connection for semi and permanent installations
- Waterproof acc. to IP65 safety standard in mated condition
- Small form factor
- Push-Pull locking mechanism for save connection
- Easy to clean, no special tools required
- Compatible with standard opticalCON DUO chassis NO2-4FDW-A*

Tactical Patch Cable

Conventional patch cables are sensitive in terms of under cutting the minimum bending radius and lateral pressure. Neutrik's tactical patch cables feature unique fiber design including a protection buffer which allows bendings with minimal radius and increased lateral pressure. Therefore the tactical patch cables are the right choice for permanent or semi-permanent applications.

opticalCON® DUO ADVANCED

Chassis Connector

NO2-4FDW-A with SCDP-0

- Ruggedized and dirt-protected 2-channel fiber optic connection system
- Shutter with silicon gasket protects optical connection from dust and dirt
- Suggested OEM equipment connectors due to LC front compatibility
- Accommodates standard LC connectors on the rear for simple installation
- Dust and water resistant according to IP65 in mated condition
- Connection on the front side either by rugged opticalCON or standard LC connector
- Color-coded rubber sealing gasket SCDP-*

Example: opticalCON DUO Chassis with transceiver adapter and SFP transceiver

NAO2*-SFP-LC

Contact resistance	< 7 mΩ	●
Insulation resistance	- initial: > 10 GΩ	●
	- after damp heat test: > 1 GΩ	●
Dielectric strength	1500 V dc	●
Rated voltage	50 V ac	● ¹

MATERIAL

Shell	Zinc diecast (ZnAl4Cu1), black chrome plating	●
Insert / Insulation	Polyamid PA 6, PBT 30% GR	●
Insert colour	MM: black, SM PC: blue; SM APC: green	●
Contacts	female: Brass (CuZn39Pb3)	●
Contact surface	Gold (gal 0.2 μm Au over 2 μm Ni)	●
Split sleeve	Ceramics	●

ENVIRONMENTAL

Operating temp.	-40°C to +75°C	●
Flamability	UL94 HB	●
Solderability	complies with IEC 68-2-20	●
Protection class	in mated condition IP65	●

¹... Not compatible to SMPTE 304M standard. Suitable for indoor (studio) camera links considering specific conditions acc. to IEC 60664-1 like pollution degree 1, overvoltage category 1 and rated voltage. For detailed information ask for the White Paper "opticalCON @ SMPTE Indoor Applications".

Transceiver Adapter

TRANSCEIVER ADAPTER

The opticalCON Transceiver Adapter connects an opticalCON chassis (NO2-4FDW*) and a LC SFP transceiver. NAO2*-SFP-LC consists of two LC-SFP adapters, 2 flat gaskets (1 mm and 2 mm) and one NO2-4FDW-A without copper contacts.

MM Transceiver Adapter
grey

SM Transceiver Adapter
blue

SM APC Transceiver Adapter
green

- Eases design integration of the opticalCON chassis connectors (NO2-4FDW*) in combination with SFP transceivers
- Compatible with all LC SFP transceivers
- Automatic sealing shutter of the opticalCON avoids transceiver soiling
- Enables use of rugged opticalCON or conventional LC connectors
- Avoids vandalism, opticalCON "protects" the transceiver

NAO2M-SFP-LC	grey	MM Transceiver Adapter + opticalCON chassis (NO2-4FDW-A) without copper contacts
NAO2S-SFP-LC	blue	SM Transceiver Adapter + opticalCON chassis (NO2-4FDW-A) without copper contacts
NAO2SA-SFP-LC	green	SM APC Transceiver Adapter + opticalCON chassis (NO2-4FDW-A) without copper contacts

NAOBO - Breakout ADAPTER

NAOBO is a flexible chassis mounting and adaption solution with cable strain relief to meet any kind of standard fiber connector (e.g. LC, SC, ST). It can be fixed to a rack with a cable tie. The breakout adapter can be mounted straight or angled.

NAOBO (KIT)

Application example

- Flexible chassis mounting solution
- Adaption solution to meet existing non-opticalCON fiber installation
- NAOBO can be equipped with any D-size chassis connector

NAOBO	Breakout Adapter Kit consisting of: 1 NAOBO plastic housing, 1 counter nut, 1 90° rear shell, 1 PG-gland, 1 cable tie and 2 screws
-------	---

Breakout Solutions

Breakout Box

NO12SABB6D-A

NO4SBB4D-PM-A
(with powerMONITOR)

opticalCON Breakout Box

- Breakout boxes are used to split multichannel connections as the opticalCON QUAD and MTP® to either dual or single channels
- Dust and waterproof according to IP67 in mated condition

opticalCON Breakout Box with powerMONITOR

The breakout boxes are used to split a 4-channel point-to-point opticalCON QUAD connection. In mated condition the boxes are dust and water resistant according protection class IP54. The breakout boxes equipped with the opticalCON powerMONITOR offer attenuation measuring for all 4 channels.

The opticalCON powerMONITOR is a cost-saving, purpose-built measurement (monitoring) device for professional fiber optic broadcast, audio and video applications.

With simultaneous monitoring of attenuation for up to 4 transmission channels, powerMONITOR provides an immediate, "on air" view into fiber optic signal strength. Visual and audible alarms can be set individually for each fiber channel, based on each channel's power budget. powerMONITOR provides clear status information, delivers early warnings for potential problems, and assists with maintenance scheduling.

- On-air monitoring of fiber optic transmission quality
- Simultaneous power measurement (+0.0/-0.1 dB measurement accuracy) of up to 4 channels
- Programmable-threshold alarms
- Rackmount and mobile units
- Operates on rechargeable battery power or on mains power with fail-safe battery backup in case of unexpected mains power interruption
- Low loss (0.5 dB maximum split loss)
- Wavelength selectable: multimode 850 nm or 1300 nm, single mode 1310 nm, 1550 nm or WDM (wave division multiplexing)

Panel Solutions

19" D-Shape Z-Panels & Plates

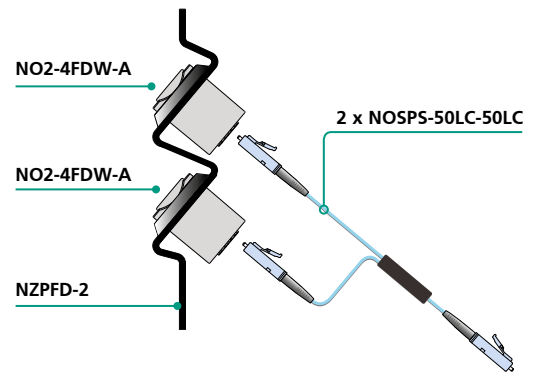

NZPF1RU

NZPF3RU

- Space saving design, ideal for cramped rack applications such as OB truck I/O panels
- Frame plate can be loaded with opticalCON DUO or QUAD and E2000 or ST or SC
- Frames can be equipped with frame plates (D-shape) or blind plates
- Best cable bend protection
- 1 RU or 3 RU frame

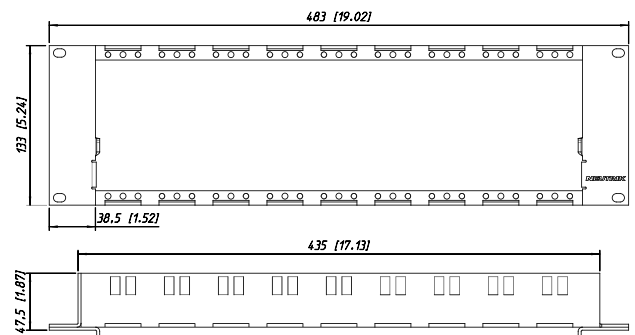

Application Example:

Panel frame 1RU

Panel frame 3RU

Z-Panels

Panel frame 1RU: NZPF1RU

Panel frame 3RU: NZPF3RU

Angled rack panel: NZP1RU-8

Splitter: NOSPS-50LC-50LC

Panel Frame

1	NZPF1RU	Panel frame 1RU for opticalCON panel frames
2	NZPF3RU	Panel frame 3RU for opticalCON panel frames
3	NZP1RU-8	Panel 1RU, 30° forward-turned and offers 8 x D-shape cutouts with M3 threaded fastening holes
3	NZP1RU-12	Panel 1RU, 30° forward-turned and offers 12 x D-shape cutouts with M3 threaded fastening holes

Panel Plate

4	NZPFBP	Panel frame blind plate
5	NZPFD	Panel frame plate for opticalCON chassis connector
6	NZPFD-2	Panel frame plate 2 x D-shape cutouts (works only on NZPF3RU Panel)
7	NZPFD-4E	Panel frame plate 1 x D-shape cutout, 2 E2000 compact chassis cutouts
8	NZPFD-4SC	Panel frame plate 1 x D-shape cutout, 2 SC compact chassis cutouts
9	NZPFD-4ST	Panel frame plate 1 x D-shape cutout, 4 ST chassis cutouts
10	NZPFD-4SC-S	Panel frame plate 1 x D-shape cutout, 4 SC simplex cutouts

Splitter

11	NOSPM-LC50-LC50	Multimode 1 x 2 splitter LC*
11	NOSPS-LC50-LC50	Singlemode PC 1 x 2 splitter LC*

* ... other connectors (SC, ST, E200) on request
